Anti-Spam Email Filtering System

Away the Junks,
Here Comes a new e-Mailing Experience

From business in between enterprises to messaging in between colleagues, e-mail has become an indispensable tool of communication in today's society. However, with recent rise of Junk or Spam e-mailing, the war on security intrusion, after tricky virus, has yet another addition of cunning enemies - Spam.

To help enterprise shaking off the troublesome Spam, HGiga enthusiastically research and developed world-first consolidate intelligent anti-spam e-mail filtering technology - SpamSherlock. This consolidate anti-spam tool is aiming at guileful Spam by layers of filtering and analysis. From DNS reverse lookup to content filtering, SpamSherlock consolidates and utilizes multiple filtering and analysis techniques to ping point and bring Spam to light. Furthermore, SpamSherlock facilitates personalized anti-spam management, which restores the balance between strict company policy and its employee needs. A new generation of e-mailing experience is now here.

SpamSherlock
